

ENERGY EFFICIENCY DAY IS OCTOBER 6, 2021

This year we're saying **THANK YOU** to New Brunswickers who've undertaken energy efficiency projects of all shapes and sizes.

Homeowners and businesses across New Brunswick have taken advantage of our efficiency programs since they launched in 2015, and the impact has been significant.

Not only do our customers save energy and money, each project has made a positive impact on our province, our environment and our economy, **saving enough energy to power 50,557 homes!**

Join your friends and neighbours by taking these low-cost steps to reduce your energy use!

- Switch to a programmable thermostat
- Swap out old lightbulbs for energy-saving LEDs
- Seal gaps & cracks around windows to keep the cold out
- Use a smart plug or power bar to cut down on standby energy use

Total Projects Completed

90,911
HOMES

965
BUSINESSES

Energy Saved (KWh):

667,891,315
HOMES

191,578,708
BUSINESSES

Economic Impact:

\$224M
SAVED IN LIFETIME ENERGY COSTS

\$143M
INVESTED LOCALLY

Now is the time to consider your energy efficiency options!
