

# 10 SMART REASONS to Drive Electric

## 1. Save thousands on fuel costs each year

On average in New Brunswick, battery only electric vehicles (BEV) cost about \$500 per year to fuel with electricity compared to gas. That means you could save over \$2,000 a year in fuel costs.

## 4. Enjoy the ease of charging at home

With a home charger you can leave each morning with a full battery. You can get up to \$750 back on your purchase of a home charging station with Plug-In NB rebates.

## 7. Enjoy reliability

There are about 20 moving parts on an EV compared to 2,000 moving parts on a gas vehicle. Fewer parts mean simpler maintenance and greater reliability.

## 10. EVs are fun to drive!

You'll love the EV driving experience, including instant acceleration and quiet drive. Just ask any EV driver and they'll tell you, there's no going back to gas-powered once you have experienced EV driving.

## 2. Enjoy the increasing range

Many EVs can travel 400+ km on a single charge. EVs are even more efficient driving in the city than on the highway due to their regenerative braking and zero idling.

## 5. Public charging networks are growing

The best websites for finding charging stations nearby or outside of your usual range in New Brunswick are [eChargeNetwork.com](http://eChargeNetwork.com) and [PlugShare.com](http://PlugShare.com).

## 8. Leave a smaller environmental footprint

Switching to an electric vehicle can reduce your CO<sub>2</sub> emissions by approximately 80%.

## 3. Choice!

EVs come in all sizes and price points, including SUVs and vans. There are more EVs than ever to choose from and new models are being introduced every year.

## 6. EV batteries are designed to last

EV batteries are designed to last 10-20 years, or more. EV batteries come with an eight-year warranty. Ask your dealer for details.

## 9. Get money back!

Get up to \$10,000 back in Government rebates when you buy or lease a new or used electric vehicle from a registered NB dealer.
