

Rigging Safety – WELL Sheet

WELL Sheet #: 1003
Revision: 2021/11

Date:		Job:		:		
Observation team member:				Signature:		
Observation team member:				Signature:		
Observation team member:				Signature:		
Location of Work:				Yes	No	N/A
1.	All employees involved in rigging practices are trained to NB Power standard.					
2.	Riggers are proactively engaged in load weight calculations, rigging equipment selection, inspection of equipment, and safe rigging practices.					
3.	Riggers communicating with crane operator via radio or hand signals have been properly trained.					
4.	Maintenance and storage of slings and rigging components is satisfactory.					
5.	Riggers inspect wire rope and other rigging equipment thoroughly before use on each shift; any equipment found defective or deficient is being destroyed or taken out of service and tagged with a Danger – Do No Use Tag.					
6.	Rigging equipment is inspected, by a Competent Person, in a formal inspection program and color-coded appropriately to distinguish current inspection.					
	NOTE: Consult with Total Health & Safety (Safety Specialist) and/or other SME(s) as necessary to verify these criteria. Please reference HSEE-03-12 Lifting & Rigging Operations for additional Verification criteria.
